Summary

Problem-solving enthusiast and aspiring Software Engineer with a solid foundation in full-stack web development, data structures, and software design. Passionate about building solutions for real-world problems that create meaningful user impact. Quick to learn new technologies, self-driven, and a collaborative team player eager to contribute to high-impact, innovative projects.

Education

Dr. D. Y. Patil Institute of Technology, Pimpri, Pune - SPPU **2024 – 2027**
B. E. in Computer Engineering *CGPA: 9.25*

S.S.V.P.S. , B. S. Deore, Polytechnic, Dhule - MSBTE **2021 – 2024**
Diploma in Computer Engineering *92.86%*

Shree Ekvira High School - SSC **March 2021**
Class 10th *86.60%*

Skills

Programming Languages: C, C++, Java, Python, JavaScript

Frontend: React, HTML, CSS, Bootstrap, Tailwind CSS

Backend: PHP, Node.js, Express

Databases: MySQL, MongoDB, Supabase

Tools: Git, GitHub, Postman

Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Database Management Systems (DBMS), Computer Network (CN), Software Engineering

Soft Skills: Problem-Solving, Leadership & Team Management, Communication & Collaboration, Time Management

Projects

EZRooms – Rental Accommodation System (Full-Stack Web App) | *HTML, CSS, JS, Bootstrap, PHP* | GitH

- **Conducted a literature survey** to analyze existing rental platforms, identify limitations, and gather user requirements, leading to an **innovative solution** tailored for students and property managers.
- Designed & implemented key features, including user authentication, profile management, role-based access control, an admin dashboard, property search with filters, review & rating feature, a favourite room feature, and a reporting system.
- Built a **responsive and user-friendly UI** using **HTML, CSS, Bootstrap, JavaScript**, enhancing user engagement, and integrated **Google Maps API** for seamless location-based property searches.
- Designed and optimized a **scalable backend** using **PHP & MySQL**, ensuring efficient data handling and implementing complex **SQL queries** for data retrieval and management.

MailCraft – AI Email Assistant | *HTML, CSS, JavaScript, Chrome Extensions API, Google Gemini AI* | GitHub

- Developed a **Chrome extension** that integrates with Gmail to **rewrite email subject lines and body** in real-time using AI-powered suggestions.

- Implemented a **tone selection dropdown** (formal, casual, concise, persuasive) and support for **custom prompts** via inline commands, improving personalization and flexibility.
- Integrated support for storing and validating user **API keys** locally using Chrome Storage API for a smooth onboarding experience.

DYP-DPU Procurement Management System | *React, Tailwind CSS, .NET* | GitHub | Live Project UI

- Contributing as the primary **frontend developer** in a cross-functional team building a centralized procurement management system for DYP-DPU University's multiple colleges and departments.
- Developing responsive, modular UI components using **React, Tailwind CSS, and Shadcn UI** to streamline requisition workflows, approval stages, and purchase order visibility.
- Collaborating with backend developers (.NET stack) to design and integrate **REST APIs**, ensuring smooth communication between frontend and backend systems.
- Project is currently under development; focused on delivering an intuitive and scalable UI experience tailored for faculty, administrative staff, and university management.

OrderEase – Restaurant Order Management System | *React, Node.js, Express.js, MongoDB, Razorpay API, Tailwind CSS* | GitHub | Live Project

- Designed and developed a **full-stack web application** to streamline in-house and takeaway orders for small to mid-scale restaurants.
- Implemented a **mobile-responsive** customer interface to place orders without login, receive a unique Order ID, and track real-time status updates.
- Integrated **Razorpay Payment Gateway** in test mode to simulate secure order payments before placement.
- Built a restaurant-side dashboard for staff to monitor incoming orders, update status in stages, and analyze order flow.
- Developed backend REST APIs using **Express.js and MongoDB**, enabling smooth CRUD operations and real-time order state updates.

Experience

Sumago Infotech Pvt. Ltd. **June 2023 – July 2023**
Web Development Intern *Nashik*

- Acquired hands-on experience in **front-end** & **back-end** development using **HTML, CSS, JavaScript, PHP, MySQL,** and **React.js**. .
- Built **interactive and responsive UI components** using HTML, CSS, JavaScript..
- Optimized website **rendering time by 30%**, enhancing **performance and user experience**.
- **Collaborated with developers** to understand best coding practices, version control (**Git**), and debugging techniques.

Achievements

- Achieved **2nd rank** in Diploma Final Year with 92.86%.
- **Led a 3-member team** for Project EZRooms, overseeing **project planning, task delegation,** and **system design**, ensuring **on-time project completion**.
- Solved **100+ problems on LeetCode** using Java, focusing on Data Structures & Algorithms (DSA).
- Secured **1st place in QUIZBATE 2025**, a competitive quiz and debate event on technical and AI-driven topics, organized by S4DS club at DYP-DPU University.
